

Over 100 Years of Experience

Ultra-Z

The REVERSE TAPER design features an extended flute that penetrates thicker materials while guiding chips away from the surface, eliminating clogging and reducing burn-out and waste.

Ultra-Z fasteners come in a full range of sizes and drives and are available with corrosion inhibiting OxySeal IITM coating for extended life.

ULTRA-Z drilling fasteners are manufactured using an innovative tapered compression point process (TCP) with tightened tolerance controls to provide an ultra-sharp cutting edge.
