

Over 100 Years of Experience

X-10 VersaVent

VersaVent comes in two sizes in lengths of 10 feet, mirroring the length of most ridge caps. The product is not profile sensitive, which allows for less SKU's and scrap material at the jobsite. VersaVent can be applied to the ridge cap by the roll former or while on the ground allowing for easier, quicker, and safer application.

VersaVent Advantages:

- Maximizes net-free area
- Durable: Tear and flame resistant
- Won't scratch roof panel
- Prevents insect, animal and snow infiltration
- Meets all building codes
- 99% recovery after compression

Ground Applied:

- One person installation
- No fall protection required.
- X-10 VersaVent will not blow away while installing on ridge cap.
- No jobsite waste.
- No additional roof measurements, chalk lines, sealants or clips required.

Lowest In-Place Cost:

- Highly engineered design allows 2 sku's to conform to most roof panel profiles
- Easy, one-person installation
- No fall protection required
- Will not blow off while installing the ridge cap
- Boxes contain 10 each 10' sections, and product can be ordered per job, matching ridge cap length
- No roof measurements, caulking, sealants or clips required
- Clean, dust free installation
- One strip of continuous glue keeps material in place during installation
- Screws go through ridge cap and VersaVent
